

GLOBAL STEEL LTD.

November 14, 2007

To Whom It May Concern:

This letter is being written in support of Mr. Cam Plaisier and his proposed business referred to as Clear Rail Consulting.

Global Steel Ltd is a privately owned corporation founded in 1990. From modest beginnings Global Steel has grown to become one of Canada's most trusted distributors of premium Oil Country Tubular Goods. Today, this Calgary based company enjoys an unmatched reputation for product quality, innovation and customer service.

Global Steel regularly ships its products via rail. Our overall relationship with the rail transportation providers has always been somewhat contentious when it relates to extra charges such as rail car demurrage and the overall quality of service. In speaking to Cam concerning his vision and products, matched with his cross-functional railway experience, we at Global Steel see a tremendous opportunity for not only Cam, but also for firms like ours. The rail shipping industry has always had grave concerns with the overall quality of rail service, but never had the tools or guidance to effectively challenge. With the introduction of Clear Rail Consulting, the industry now has the ability to call upon and utilize this important resource and then use that resource to effectively dispute all types of rail related service issues.

Global Steel fully supports this venture and would certainly consider utilizing this product to assist in dealing with our rail related service issues. Global Steel also feels that many shipping sectors within the entire rail sector will in fact also see the benefit of using this service.

Sincerely,
Global Steel Ltd.

Harold Spicer
President
