To Whom It May Concern,

In early 2009, after a significant increase in service fees by the rail road, Lantic Inc. started evaluating tools to reduce demurrage costs at its facilities in Vancouver, BC and Taber, AB.

DMS, offered by Clear Rail in Canada, provided Lantic Logistics with a simple, yet powerful tool to track demurrage charges, and to compile simple statistics on rail car usage, like transit times and delays.

The timely support provided by the DMS team was invaluable in getting the program running in a very short period of time. In addition, Mr. Plaisier's operational experience was an added value that helped to clear up some demurrage accounting irregularities.

Lantic Inc. has had a very positive experience with Clear Rail and would recommend DMS as a tool for Demurrage Management.

Sincerely

Mohamad El-Kara  
Logistics Coordinator  
Lantic Inc.

*Montreal, Taber, Toronto, Vancouver*
